

AROMA ZONE

EXPERT NATUREL EN SOINS & BEAUTÉ

OCTOBER 2016 EDITION

The family adventure Aroma-Zone was born in 2000, inspired by *our admiration of the plants' power* and all of the treasures nature can give us.

True pioneer, Aroma-Zone was one of the first aromatherapy's information website and an essential oils online seller since 1999. Years later the idea of a crazy bet germinated in our Provençal premises : to come up with all that you need to *manufacture your own healthy, efficient and 100% natural cosmetics* ! And you are a growing number to subscribe to this concept.

Since the beginning, we are willing to propose the *the best quality at a better price*, establishing lasting close ties with a network of devoted producers, in France and all over the world. Today, thanks to your *trust*, Aroma-Zone's adventure keeps on glowing every day and keeps on making available *the most beautiful natural extracts* for all, in a respectful approach of human beings and the planet.

THANKS !

Valérie, Anne et Pierre Vausselin, founders

Our commitments

1. Our essential oils are **100% pure**. They are carefully selected to meet strict specifications. We carry out chemical and physical analyses of each batch (refraction index, chirality, density, etc) and a chromatography test, so we can assure you of the botanical identity and biochemical characteristics of all our essential oils (EOBBD: Essential Oils Botanically and Biochemically Defined).

2. We only use **100% natural products, with no added preservatives or synthetic fragrances**. All our products are guided by strict specifications and supervised by our Quality laboratory.

3. We are working hand in hand with producers from all over the world. We are remunerating them at a fair price, we nurture **sustainable and fair trade**, and support traditional production chains.

4. We are committed to **the animals protection organization One Voice**. No product is tested on animals et no animal product or sub-product is used in the making of our products (except products from beehives, mare's milk, donkey's milk and silk proteins). We always check the animals' living conditions and ensure that the method of obtaining the product does not endanger the animals' welfare.

5. We are favouring **ingredients from ecological agriculture and certified organic** to preserve soils, air and water quality as much as the producers' health. Our ingredients are naturals and biodegradables.

6. We favour **local supplies to restrict the impact of transport on the environment** as well as the use of recycled and recyclable packings, warranty without bisphenol nor phtalates, (glass, recycled PET, cardboard) and product locally.

7. To protect your parcel's content, we are using **recycled crumpled paper** and biodegradable corn starch wedging particles that decompose in water without any toxic residual.

THE QUALITY AROMA-ZONE

The quality of our essential oils

The vast majority of our essential oils comes from :

- **wild plants**, a guarantee of the best possible quality for essential oils because as the plant has grown in its natural biotope, without interference from people, it produces the purest essential oil,
- or from **certified organic** plants farmed by independent groups,
- and finally from plants grown using **environmentally friendly** methods with no use of chemical products, when organic certification is not available or too costly.

The majority of our essential oils are extracted from **fresh plants at the place of harvesting** ; this allows us to extract whole and fresh essential oils from plants which have not been damaged by transport conditions or the haulage time.

Our essential oils are pure and natural, whole, terpeneless and non-modified.

They are fully defined (producer, botanical name, chemotype, country of origin), which is where the EOBBD mark comes from (Essential Oils Botanically and Biochemically Defined).

Our information labels guarantee full transparency of the nature of the essential oil you buy :

- botanical name of the plant
- chemotype (main biochemical molecules)
- distilled part
- exact origin of the plant
- cultivation type
- batch no. (guaranteeing traceability back to our supplier)
- expiry date

Each order is accompanied by essential oils precautions for use which must be read before using the essential oils.

Each batch of essential oils is tested by an independent laboratory which guarantees us the compliance of the chemical and physical criteria (density, refraction index, chirality, etc) of each oil, **its purity and its exact composition**.

So we have a gas **chromatography (Chemotyped Essential Oils)** for each batch.

These in-depth analyses guarantee the **quality and purity** of our essential oils.

The quality of our plant oils

We prefer **virgin plant oils, from the first cold pressing of wild plants or plants from certified organic farming**, extracted within a year and 100% pure. This extraction method, combined with how fresh the oil is, ensures you will receive very high quality oils with all their properties intact. These plant oils are analysed by an independent laboratory to assess the fatty acids composition in particular.

The quality of our hydrolates and other natural extracts

Aroma-Zone aromatic hydrolates are **highly concentrated, 100% pure and incredibly fresh** ; the majority comes from plants from certified organic farming. These hydrolates are fresh products and must be kept refrigerated.

The other extracts (powders, gums, waxes, etc) have been carefully selected and tested in order to offer you the best possible quality. All extracts and other products are tested by our quality assessment laboratory.

The quality of our certified organic natural cosmetics

Our cosmetic products are formulated by our cosmetic experts. They are made using natural components and with all the benefits of our first rate knowledge of raw materials. The high concentration of active ingredients increases efficacy. They have been through a detailed assessment and testing process by an internal panel of consumers to perfect the formulas. Our production team pays particularly close attention to complying with cosmetic production best practices, particularly with regard to hygiene standards. The procedures we apply allow us to guarantee full traceability for each batch of products. Because we produce in small batches to provide a sales stock of two to three months, our products are incredibly fresh. All our products are painstakingly tested in line with a strict technical specification created by our quality manager and our pharmacist.

ESSENTIAL OILS

● **Very powerful** essential oil, may have a certain toxicity at high doses or after long-term use. Use with caution and for short periods.

● This essential oil may cause **photosensitivity**. Do not expose skin to sunshine after use.

● This essential oil can be **dermo-caustic** (irritating to the skin) and/or **prone to cause allergic reactions**. Use highly diluted in a vegetable oil for skin application and always test on the inner elbow crease before use.

Perfect for adding a **natural note of yellow fruits** to shower gels, creams and balms; it blends beautifully with petitgrain. Use in the kitchen to flavour **fruit salads and milkshakes**, etc.

APRICOT

00991 10 ml 3.20 €

A **gourmet, sun-kissed aroma** for beautiful lip balms, body oils and lotions, and shower gels.

ORGANIC CARAMEL

00993 10 ml 2.90 €

The gourmet, sweet scent awakens the senses and the taste buds when used as part of a lip gloss, cream, balm, or shower gel...

ORGANIC RASPBERRY

00990 10 ml 3.50 €

Sweet and slightly zesty, such a treat in lip balm or lip-gloss. It can be combined with other fragrances to enliven your cleansing base.

WILD STRAWBERRY

01226 10 ml 2.90 €

This unusual extract gives an **original sweet and subtle note** to cosmetic products and eau de toilette. It's also a go-to product for giving that final touch to **sorbets and cakes**, etc.

01227 30 ml 4.90 €

ORGANIC MANGO

00996 10 ml 3.50 €

This extract is as **exotic and gourmet** as it is sweet and fresh. It gives an exquisite **exotic touch** to shower gels and haircare products.

ORGANIC PINEAPPLE

01220 10 ml 3.50 €

The **fruity citrus** scent is the true representation of pineapple flesh. As **delicious in cosmetics as in the kitchen**, it makes exotic fragrances and aromas.

ORGANIC CHOCOLATE

01001 10 ml 3.90 €

This is a delicious warm **chocolate scent**. To use with cocoa butter or blend with mint or citrus fruits to create **mouth-watering, chocolatey treatments**.

ORGANIC FIG

01246 10 ml 2.90 €

The perfect way to give a **gently fruity, smooth, and honeyed note** to your creams, lotions, and body butters, or even perfumes and air freshener.

PASSION FRUIT

01230 10 ml 3.50 €

Its **powerful fragrance** is perfect for **exotic perfumes**. Its aroma is also suitable for making **delicious cocktails, sorbets, ice creams, and fruit salads**.

NOUGAT

01247 10 ml 2.90 €

A sweet, sugary, almond and deliciously honeyed fragrance, coupled with a very popular deep, rich note to make your masks, scrubs and creams full-bodied and sweet.

MELON

01228 10 ml 2.90 €

Its **notes of ripe melon** will delight melon fans. It is excellent for creating **yellow fruit notes** in perfumes. It is also very popular for adding to **cocktails and sorbets**.

GINGERBREAD

01248 10 ml 2.90 €

The natural gingerbread aroma is a **real treat, and its warm, spicy, liqueur aromas** are perfect for cosy preparations.

ORGANIC PEAR

01000 10 ml 2.90 €

The sweet fragrance of **Williams pear** makes a delicious combination with chocolate, lychee or vanilla. An **essential extract for smooth and sweet** creations.

ORGANIC VANILLA

01002 10 ml 6.50 €

Smooth, caramelised, and gourmet, this Bourbon de Madagascar Vanilla extract is easier to use than oleoresin. It is ideal for adding a **vanilla flavour** to your products.

EMULSIFIERS

A LARGE RANGE OF VEGETABLE ORIGIN EMULSIFIERS TO GET THROUGH YOUR CREAMS AND NATURAL HOME-MADE MILKS.

CETEARYL ALCOHOL

Vegetable-based, the cetearyl alcohol is used as a co-emulsifier to **thick and stabilize your creams**. Non-oily, it brings a smooth and unctuous texture to your cosmetics.

02592 100 g 1.90 €

CETYL ALCOHOL

It can be used as an **additional emulsifier to stabilize and enrich your creams**. It is used to create **thick, nourishing creams**. emollient textures.

02207 100 g 1.90 €

VEGETAL INGREDIENT

Vegetable-based and **biodegradable**, this ecologic ingredient is used to make **conditioners and hair-care products**. It leaves your hair easy to style, voluminous and strengthened.

02591 50 g 3.90 €

COEUR DE CRÈME

This plant-based emulsifier provides a **wide range of textures** from sprayable lotion to thick cream. You can blend vegetable oils in this versatile and easy-to-use product.

02457 30 g 2.50 € 02503 100 g 6.50 €

Polawax is a **plant-based emulsifier** used to make beautiful **thick creams**, as well as in mousses.

00825 30 g 2.50 € 00826 250 g 15.00 €

EMULSIFYING WAX NO. 2

This emulsifying wax is easy to use and **blends sugar and alcohol from plant sources**. It is used to create **thick, nourishing creams**.

00960 30 g 2.20 € 00961 250 g 11.50 €

EMULSIFYING WAX NO. 3

Self-emulsifying, **very easy to use in smooth, thick creams**. Non-oily and fresh to touch.

01470 30 g 1.50 € 01471 250 g 4.90 €

SOFT OLIVE EMULSIFYING WAX

An **extra-soft emulsifier** made from olives and wheat, with **softening and protective properties**. Ideal for use on **sensitive, fragile skin**.

01476 30 g 3.90 € 01477 100 g 9.90 €

PROTECTING OLIVE EMULSIFYING WAX

This emulsifier helps make very rich water-in-oil emulsions and is perfect for making **cold creams**. It creates creamy textures that leave a **protective film on the skin**.

01478 30 g 2.50 € 02208 100 g 5.50 €

QUICK EMULSION

This liquid emulsifier is **easy to use cold** for "water in oil" emulsions. It produces fluid milks and creams, or **thick "cold creams"** when magnesium stearate is added.

02375 50 ml 4.50 €

EMULSAN

This sugar-based emulsifier is a miracle ingredient for making **soft and melting creams and milks**, it has excellent moisturising properties. It helps you create a **wide range of textures**.

01955 30 g 2.30 € 01956 100 g 5.90 €

MF EMULSIFIER

When mixed with the VE emulsifier it produced an emulsifier that is perfect for making **light emulsions, rich in water or herbal distillates**.

02205 100 g 2.50 €

VE EMULSIFIER

It is an additional plant emulsifier with the properties of **relaxing and nourishing the skin for light and penetrating emulsions**.

02206 100 g 2.50 €

SUGAR ESTER

A unique ingredient in that it can be used to make both **emulsions that are absorbed easily** as well as being an excellent moisturiser in its own right.

00962 30 g 3.50 €

ORGANIC GELISUCRE

Used **cold**, this emulsifier is suitable for products based on **herbal distillate or sensitive oils**. The textures created range from **rinse-off oily gels to fluid spray able milks**.

01474 50 ml 5.90 € 01475 100 ml 10.50 €

SOYA LECITHIN (NON-GMO)

This plant emulsifier is the only one of its kind that produces **creamy, silky textures that are easily absorbed**. It makes light yellow creams and lotions.

00968 30 ml 2.50 € 00969 100 ml 4.20 €

OLIVEM 1000

This olive based emulsifier is ideal for making **light, easily absorbed emulsions** with a texture that is ideally suited to the skin. **Long-lasting moisturiser**.

01472 30 g 3.90 € 01473 100 g 10.20 €

TENSIOACTIVES

A RANGE OF VERY SWEET VEGETABLE ORIGIN TENSIOACTIVES TO MAKE YOUR LIQUID SOAPS, SHOWER GELS, LIQUID AND SOLID SHAMPOOS THAT RESPECTS YOUR SKIN AND THE ENVIRONMENT.

BABASSU FOAM

Derived from Babassu oil, this cosurfactant is **rich in unsaturated fatty acids and sterols**. It protects skin from harsh external elements, lathers into a rich, creamy foam, restores softness to hair, leaving locks easy to style.

01265 100 ml 2.90 € 01264 250 ml 4.90 €

GENTLE COCONUT

Derived from coconut oil, this **lipid-replenishing** active ingredient is used for its **softening and moisturising** properties in shower gels and shampoos designed for sensitive skin.

01262 250 ml 5.50 €

SODIUM COCO SULFATE

This tensioactive is **the key ingredient for making your solid shampoos**. It foams particularly well, making it pleasant to use and meaning vegetable butters or oils can be included in solid shampoos.

03035 50 g 1.30 € 02625 500 g 6.90 €

SODIUM LAUROYL SARCOSINATE

This tensioactive **improves foaming** and provides a **creamy touch to your foaming products**. It gently cleanses, without taking off the skin's protective film. It has an acidic pH and thickens mixtures.

01952 100 ml 2.80 €

TENSIOACTIVE SCI

Very well tolerated by the skin, this solid tensioactive allows you to **soften your solid shampoo** formulas whilst creating a rich and creamy foam.

02626 50 g 1.70 € 02627 500 g 8.90 €

TENSIOACTIVE SLSA

Derived from coconut oil, this tensioactive produces **excellent foam**, even in hard water and in the presence of oil. It is ideal for using in **shower creams, bath bombs**, and also in **bars of shower wash and shampoo bars**.

01868 100 g 4.20 €

GENTLE MOUSSE BASE

This blend of **gentle surface active agents** combines well with Coconut to make gentle shower gels, shampoos, bubble baths, and facial cleansers.

01263 250 ml 4.90 € 01530 1 L 12.90 €

THICK MOUSSE BASE

Derived from fatty alcohols, coconut oil and corn sugars, this **ultra-gentle** surface active agent is used to make **gentle cleansers, thickening them nicely**.

01261 250 ml 3.50 € 01531 1 L 9.90 €

SUGAR FOAM

Derived from corn sugar and coconut oil, this gentle product is an **excellent cleanser** and produces a **satisfying mousse**. It can be used to make **thick and gentle shower gels and shampoos**.

01260 250 ml 3.50 €

MULTI-USE AGENTS

THESE MULTI-FUNCTIONAL PRODUCTS ARE ABSOLUTELY ESSENTIAL TO HAVE STORED IN YOUR KITCHEN CUPBOARD FOR AN ECO-FRIENDLY APPROACH TO HOUSEHOLD CLEANING.

BICARBONATE AND CITRIC ACID CAN ALSO BE USED TO ADJUST pH LEVELS IN COSMETICS AND IN MAKING BATH BOMBS.

CITRIC ACID

This descaling agent is used as a **household cleaning product**. It can also be used to balance the pH of some products. It is also an essential ingredient in **making bath bombs**.

00854 250 g 2.50 €

BICARBONATE OF SODA

This **household cleaning product** is extremely eco-friendly, but can also be used to **whiten and clean teeth** or to make bath bombs and deodorants.

02210 500 g 2.50 €

SODA CRYSTALS

These crystals **remove grease and stains** and are a **multi-use, environmentally friendly household cleaner**. Used for laundry, the dishes, pipe maintenance and cleaning or scouring surfaces, etc.

01869 500 g 2.50 €

SODIUM PERCARBONATE

This **environmentally friendly, household cleaner** has **degreasing, whitening and disinfectant properties**. It is mainly used as a laundry **pre-treatment** and to **remove mould and damp stains** in the kitchen, bathroom and on balconies, etc.

01881 500 g 2.90 €

OTHER INGREDIENTS

THESE BASE INGREDIENTS ARE NOTABLY USED AS EMOLLIENTS, TEXTURISING AGENTS OR pH-CORRECTORS IN MAKING YOUR COSMETIC PRODUCTS.

PLANT STEARIC ACID

An excellent **consistency factor**, it makes emulsions smooth and rich. It can be used in the preparation of «butters» based on vegetable oils. It is also very useful in creating **candles and soaps**.

00901 250 g 2.50 €

CALCIUM CARBONATE

This multi-purpose product is known for its **gentle abrasive action on teeth** and for its **thickening and opacifying action in creams**.

01020 250 g 1.50 €

CAPRYLIN

These vegetable-based triglycerides are in fact **extremely fine and easily-absorbed** oil base used to make 'dry' oils as well as non-greasy emulsions.

01668 250 ml 3.90 €

COCO SILICONE

This **emollient of natural origin** is used in **creams and milks** to add an evanescent aspect and to **render them silky smooth**. They can also be used on hair to tame locks and boost shine.

01802 100 ml 4.90 € 01847 250 ml 9.50 €

DICAPRYLYL CARBONATE

This emollient of plant origin is fine and **velvety to the touch and easily absorbed**. It is an excellent substitute for paraffin and synthetic silicon oils. It is **non-oily** and lifts the greasy feel of vegetable oils.

01953 100 ml 5.50 €

DRY TOUCH

This plant-derived **emollient** is used in its oily phase for creating **dry oils** or to lend an **easily absorbable** aspect to your 'home-made' creams and milks. **Evanescant and very dry**, this is a professional ingredient!

02373 100 ml 4.90 €

LIMEWATER

An essential ingredient in making **oleo calcareous** liniments for **nappy rash products** or **make-up remover**.

00858 250 ml 3.20 € 01616 1 L 7.50 €

ECO-REMOVER

This **ester is of natural origin** and is used as a **gentle solvent in organic** nail varnish removers. **Eco-friendly, non-toxic and with no acetone smell**, it gently removes nail varnish without drying out the skin or damaging the nail.

02374 100 ml 3.90 €

VEGETABLE GLYCERIN

This vegetable glycerine is extremely pure and is of very high quality. It **protects skin and hair from dehydration** while **smoothing and restoring skin and hair suppleness** thanks to its **emollient properties**.

00851 250 ml 3.20 € 01175 1 L 7.50 €

SULFATED CASTOR OIL

This is a **water-soluble oil**, meaning it dissolves completely upon contact with water making it the perfect ingredient for creating 'micellar water' or for enriching shower gels and shampoo with oil.

01613 100 ml 3.50 € 01614 250 ml 5.50 €

ISOPROPYL MYRISTATE

Essential in creating your perfume **compositions for use in fragrance diffusers**, this fine, easily-absorbed oil base can also be included in your 'home-made' cosmetics for an **extremely soft texture** with no sticky residue.

01779 250 ml 5.50 €

PLANT-BASED LANOLIN SUBSTITUTE

A must have to **create your home-made balms and glosses** and to make your creams feel smooth and increase their **protective and anti-ageing capacity**.

00856 50 ml 5.50 € 01505 100 ml 8.50 €

MAGNESIUM STEARATE

An agent that improves feel and texture, magnesium stearate **improves the staying power of make-up and makes it last longer**. It also **binds and makes products opaque**, and is very useful in making **bath salts and bombs solid**.

01954 100 g 3.50 €

🌿 **Precautions and proper use of essential oils** *Read before use*

- **Take care when using essential oils and use them in moderation.** Essential oils are very strong.
- Essential oils should not be applied to the eyes, the eye contour area, neither into the ears. In case of contact, apply a plenty of vegetable oil and then rinse with water. Take promptly medical advice. Essential oils must be diluted before being applied to mucous membranes.
- Always keep essential oils out of children's view and reach. For their safety, never remove the dropper capsule from the essential oil bottle.
- Some oils can be irritating or sensitizing. **Most essential oils are diluted in a vegetable oil when applied to the skin.** We advise to always carry out a skin tolerance test in the crook of your elbow at least 48 hours before using the oil on the skin, either pure or diluted. If you notice a reaction (redness, itching, stinging, etc.), do not use the mixture.
- Below oils are photosensitizing : Angelica, Bergamot, Celery, Lemon, Lime, Khella, Lovage, Mandarin, Orange, Blood Orange, Grapefruit, Tagetes, Lemon Verbena and St. John's wort infused oil. **After applying these oils, avoid to be exposed to the sun or to the UV for 6 hours.**
- **Some essential oils can be irritant, especially sensitising or can present a toxicity for a significant dose or for a long time** : Yarrow, Garlic, Ajowan, Bitter Almond, Dill, Anise, Holy Basil, Exotic Basil, Copaiba balsam, West Indian Bay, Yellow Birch, Cinnamon (bark and leaf), Cassia, Caraway, Atlas Cedarwood, Himalayan Cedarwood, Cumin, Turmeric, Cypress, Tarragon, Eucalyptus cryptone, Eucalyptus globulus, Peppermint Eucalyptus, Sweet Fennel, Wintergreen, Clove (bud and leaf), Everlasting, Inula, Khella, Lantana, Bay Laurel, Lemongrass, Mastic, May chang, Lovage, Melissa, Comrmint, Peppermint, Spearmint, St. John's wort, Nutmeg, Compact Oregano, Kaliteri Oregano, Common Oregano, Parsley, Scotch Pine, Rosemary camphor, Rosemary verbenon, Balsam Fir, Silver Fir, Winter Savory, Sage aromatic oil, Wild Thyme, Tagetes, Blue Tansy, Turpentine, Thymus borneol, Thyme thymol, Lemon Verbena and St. John's wort infused oil. For further informations or specific precautions for each essential oil, check online each product sheet on www.aroma-zone.com.
- As a rule, **we prevent from using essential oils by pregnant or breastfeeding women, persons suffering from epilepsy or from hormone sensitive cancers, hypersensitive persons, and in general persons suffering from health problems. Unless medically prescribed, do not use essential oils for babies and children under three years old. For children over 3 years old, use essential oils only under medical supervision.**
- Never inject essential oils.
- If you suffer from respiratory allergies or asthma, avoid inhaling the diffusion of essential oils.
- Do not combine essential oils and medicinal treatments without medical supervision.
- Consult a doctor regarding any therapeutic indication or before taking any essential oil orally. Essential oils should be diluted in oil, honey, sugar or on a neutral pill when taken orally.
- If essential oils are accidentally swallowed, take several spoonfuls of vegetable oil in order to dilute the essential oil, contact an anti-poison center and take promptly medical advice.
- If you have any doubts or enquiries, do not hesitate to ask your doctor for advice.

The information regarding essential oils that you can find on our website, in our catalogue and in our brochures is for reference only. It is a summary of our interpretations of the various works on aromatherapy we have studied. It should not under any circumstances be considered as a medical piece of advice and we deny any liability in relation to this information.

🌿 **Best practice for making home-made cosmetics** *Read before making any preparations*

Before you start making your own cosmetics, please, read these warnings :

- **Some ingredients may be allergenic** : always perform a preliminary test applying your preparation over about 1 cm² in the crook of your elbow at least 48 hours before using your preparation in order to ensure that no reaction occurs (stinging, redness, difficulty breathing etc.).
- All cosmetics containing an aqueous phase (water, hydrolate) are **very liable to microbiological contamination**. So, it is essential to manufacture your home-made creams in very hygienic conditions.
 1. **Sanitize** the utensils and containers before use : either by immersing them in boiling water for 10 minutes (excluding plastic containers and pumps) and drying them thoroughly with a clean and dry cloth, or by rinsing them with pharmacy alcohol (excluding glass containers, little bubble jars, mini powder compacts, flat cases and 40 and 80 ml powder compacts that are not alcohol resistant : sterilize with boiling water) and air-drying them.
 2. **Wash your hands before** getting started and wear clean gloves.
 3. **Avoid touching** the preparation and ingredients with your hands.
 4. **Store the temperature-sensitive preparations in cool conditions** and use them quickly.
 5. **Use tested «natural preservatives»** such as Aroma-Zone's Cosgard (respect the dosage).
 6. **Immediately throw away** any preparation when you notice the slightest amount of mould, an objectionable odor or changes in its appearance etc.
- It is sometimes necessary to heat certain raw materials up to a high temperature. The precautions for use must be respected to avoid burns and spitting. It is advisable to wear eye protection.
- Always carefully label and date your preparations and keep them out children's of reach.
- **Respect the indicated doses. When making your product, fill in a traceability book, note the composition of your product and the batches of ingredients used, as well as the manufacturing date.**

The home-made cosmetic recipes available on our website and in our documents are examples of how to use our ingredients ; we deny any liability in relation to these examples. They are original works protected by copyright. They may not be used for commercial purposes without a previous agreement that imposes limitations.
